Hi Kelly – Please see below.

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

How does that sound?

Jim

Subject: RE: PCB Remediation Waste

Hi Jim – Nothing final yet. The contractor is waiting for acceptance from the facility before we finalize anything.

I do have another question. We are preparing a defense from a claim for additional money from the contractor because in their eyes Coplay was licensed by PADEP to accept the material.
Can you cite the regulation regarding why Coplay was not an acceptable facility?

I think CFR 761.61 (a)(5)(v)(A), which in turn references Section 258 for MSWLFs and Section 257.5-.30 for CESQGs. My understanding is that Coplay is not a MSW Landfill. And I don't think that 257.5-.30 applies since the client in this case is not a CESQG.

Thanks again.

Hi Chris – I have contacted NJDEP and they said the facility can accept material with PCBs < 50 ppm, provided that it is not hazardous for other constituents. Please confirm that the contractor will actually be using this facility and I will prepare the approval. Please remember, however, that your client is at risk if any work is done (other than disposal in a TSCA-permitted facility) prior to approval issuance.

Good Morning Jim – The contractor for the Harrison School Site is requesting a pre-approval of Cumberland County Solid Waste Complex in Millville, NJ. Attached is the facility's permit.

I have a call into the facility to independently verify that they are properly licensed to accept PCB Remediation waste (<50 ppm).

Does EPA have any objection to this facility?

Thanks

Chris Watt

Chris,

I'm attaching a permit for the Cumberland County Landfill. They are considering accepting the PCB Remediation Waste soils. They are also a Sub-Title D landfill. Can you please check to see if the EPA has any issues with them accepting the soil. Their approval process is a bit more streamlined than the PA facilities which would expedite the process.

Thanks,

Sergio Cardoso
